ENGINEERING SERVICES

- System upgrade designs
- Building of electrical systems integrated with mechanical machinery
- Commissioning and optimisation

Lenze

Lenze was founded in 1947 and is now a world-wide company with decades of experience in motion. Their experience and expertise is strategically applied to the consumer goods industry providing innovation, products and automation solutions which is continually developed to meet production line demands.

Lenze offers the most modern automation and motion technology for the consumer goods industry – based on the three standards of cost awareness, maximum quality and flexibility. The increasing requirements placed on consumer goods are accompanied by growing demands on the machines in the consumer goods industry.

The end customers in this industry are demanding long maintenance intervals, clear error messages, the speedy worldwide availability of spare parts and energy efficiency for the machines. For these challenges **Lenze** is a worthy partner.
