

SAPower

**Industrial
Automation Partner**

OUR COMPANY

SA Power Services (Pty) Ltd is a privately owned company founded in 1969.

SA Power has a footprint throughout South Africa with offices in all major centers. We are a hard-working team of over 55 engineers, technicians, and administrators. We have a strong commitment to service, collaboration and maintaining high-quality standards. Due to our experience and expertise, we regularly provide support into Africa, Europe, and Asia.

We are proud of our success as leaders in the world of Machine Automation. We have a long history in providing Systems Solutions over a wide range of industries in the South African market. Due to our inquisitive nature and not accepting the norm, we continually strive to develop better and new solutions to meet the requirements of our customers.

It is important for us to understand our customer requirements. In return, our customers benefit from our combined product knowledge, application, and project experience. This is backed up by our service commitment building trust and ensuring long-term partnerships.

OUR MISSION

Quality & Service: Delivering excellence in long-lasting, safe products and upholding service ethics throughout.

Partnerships: Fostering strong and respectful relationships with clients, suppliers, and employees.

Workplace: Creating a supportive and empowering environment for employee well-being.

Growth: Continuously seeking improvement, transparency, and collaboration to achieve collective success.

Sustainability: Ensuring financial health, responsible stakeholder contributions, and compliance with legal and safety regulations.

Discovery: Adapting to a changing world by embracing lifelong learning and a strong product portfolio.

OUR PROMISE

To stand by our values and ethics.

To build partnerships that provide more than our customer needs.

To build confidence and trust in our people, products, and company.

To offer the optimum quality products, services, and solutions for our customers.

To have open communication, debate, and discussions.

To listen, properly understand customer needs and work with our customers.

To work hard as a team and never walk away from our problems.

To protect our environment.
